

472
Calendarium Astrologicum: 70

OR, AN

ALMANACK

For the Year of our Lord God,

M D C L X X V I.

It being the Bissextile, or Leap-year,
Discovering the State of the Year in general;
with the Sign for every particular day, the
Eclipses of the *Luminaries*, Full Sea at *Lon-*
don Bridge; the Terms and their Returns;
Sun Rising, &c. together with the com-
mon Furniture of other *Almanacks*.

Also sundry other useful Observations:

Whereunto is added

A Description of the most eminent Roads in
England, from Town to Town; and the
certain time of any Mart or Fair, happen-
ing to be held in any of them.

By **THOMAS TRIGGE**, Gent.

Student in Physick and Astrology.

Astra regunt Homines.

Sed regit Astra Deus.

LONDON,

Printed for the Company of Stationers, 1676.

The Vulgar Notes of the Year 1676.

In both Accounts, *Viz.*

Julian or English.

Gregorian or Foreign.

May 14.	White-Sunday.	24 May.
May 21.	Trinity Sunday.	31 May.
December 3.	Advent Sunday.	29 Novemb.

The glorious Planet *Venus* is our Evening Star from the beginning of the year, until the 29 of *August*, and then after her Conjunction of the *Sun*, she becomes our bright morning Star again and continues so to the years end.

Note that in the last Column of each Page in the Kalender is inserted the Sun Rising, which subtracted from 12 hours leaves the time of Sun Setting; for the Sun doth Rise so many hours before or after six, as he doth set after or before six. And if you double the Sun Rising it is the length of the night, and double the Sun Setting gives the length of the day.

Note also that the Roman Account begins 10 days after the English account, and the 11th day with them is the first with us, and consequently the last day of the month with us is the 10 with them.

A Chronology of things Memorable.

T	The Creation of the World	5696

The Dominion of the Moon in Man's Body as the palleth the 12 Zodiackal Constellations.

THE MOON IN A

THE MOON IN A

V Head and Face.

The Characters of the Planets, Nodes & Aspects

♄ Saturn } ♀ Venus
♃ Jupiter } ☉ The Sun. } ♀ Mercury
♂ Mars } ☾ Luna.
♁ Dragons Head. } ☿ Dragons Tayl.

- ♄ Conjunction is no Aspect therefore improperly called one
- * Sextile is an Aspect of 60 degrees distance.
- Quadrant is an Aspect of 90 degrees distance.
- △ Trine is an Aspect of 120 degrees distance.
- ♁ Opposition is an Aspect of 180 degrees distance.

Kepler defines an Aspect thus,
Est angulus formatus a radiis luminis binorum Planetarum
apud terram efficitur ad stimulandum naturam sublimarem
Epit. Astron. pag. 840.

TRIGGE 1676.

An Apology Physick Dismissed.

That the pre-dominant of Humors, is the cause of all diseases; and that the cure of these humors, is done by the various and different Applications of Drugs, is not even by Hippocrates and Galen themselves acknowledged. For then to these Rules Afforded, to be observed for the cure of the sick.

Let the	Sanguine	Bleed the	♂, or ♀.
	Cholerick		♂, or ♀.
	Pituitous		♂, or ♀.
	Melancholey		♂, or ♀.

But let her be also in the Aspect of the Fortunate Planets, seated in a fortunate part of Heaven.

It is good to judge with Astrologers, when the ☿ is in ♈, or ♉, when she is in ♊, and ♋, when in ♌, because she is posited as before directed.

Vomits are unsafe for all sorts of complexions and constitutions; yet sometimes there is a necessity for them; as when the Disturbance is above the stomach; it being impossible for a purge, or purgative Medicine, thence to carry it off; when there is a cause, they may be safely taken when the ☿ is in ♈, ♉, or ♊, in any good Aspect of ☿, ♀, or ☾.

Clysters are most conveniently administered, when the ☿ is in ♌, ♍, or ♎, prior to the ☿, or ♀, or ☾, in any good Aspect of ☿, ♀, or ☾, in any good Aspect of ☿, ♀, or ☾.

Very proper to Bath, when the ☿ is in ♈, ♉, or ♊, in any good Aspect of ☿, ♀, or ☾.

Convenient to cut Hair, the ☿ being in ♈, ♉, or ♊, increasing in Light. And although this be the opinion of many, a trivial thing to observe; yet were it more taken notice of the Gallants of our times, they need not disguise themselves with Venus Locks; But they, it may be, esteem it an Honour to be attended with a part of her, that Originally injured them.

Medicina a medico; medela ab altissimo.

TRIGGE, 1676.

*An Astrological Description of the four Seasons
(or quarters) of the Year, &c.*

(Book II. Of the Spring.)

The Spring season, or the Vernal Equinox, begins at that time the Sun toucheth the first point (or scruple) of Aries, which this year happened upon March, the 9 day 1 hour, 22 min. afternoon, and the Figure of Heaven from the Gadharjes Ephemerides, set for the famous City of London, is here you see.

In this
vernal
Figure,
we find
the
earthly
sign
Virgo af-
cends
the Ho-
rizon,
and that
part
thereof
which
Astro-
logers
call the
face or
Decanal
of the
Sun, Pri-

*ma facies virginis est solis, & est seminandi & arandi verbarum
populationem congregandi divitias & diligendi vitam quam
liber*

saith *Haly de jud. Alter. fol. 9.* The first face of *Virgo* is the Sun, and is a face of Sowing, Plowing, of planting Herbs, peopling, gathering together Riches and Food provisions. If so, truly may we ascribe unto this very happy and fortunate year in the general? I could heartily wish it might prove so. But in regard the *Jov* and *Mercury* (the principal significators of the worldly good) are so unpropitiously posited in the eighth house of the *Salcator*, and *Mars* in the fifth house in the *Quartile* to the *flowery Lady* of the Eleventh house (the house of hope) Hence I may without good reason suspect we shall in some measure fall short of hopes and expectations, and must therefore content ourselves to enjoy a shorter measure of happiness, than what we were hereby seemingly promised, according to the nature and current of things in the world.

Mars in the fifth house in a *square*, a fixed and Aereal sign may rationally be lookt upon in point of Art to be the cause of many dangerous Diseases proceeding from, or occasioned by Blood corrupted, Surfeits, and other intemperances of body too frequently practised in these days amongst the Sons of men. The same position portends danger of the lesser kind of Cattle also; and further intimates unto us, that *Servants* this year should be too much prosecuted thereby bring great injury and damage to their Masters, unless there be more than ordinary care taken by them to prevent such fraudulent Actions.

Venus in the fifth house signifies, that men should very much prosecute their pleasures and delights; and Women in general will not only be more pregnant, but more happy in bringing forth Children, and with less danger than in former years.

Mercury Lord or Governator of the East-Angle, and partly of the Mid-heaven, also in the Dignities of *Mars*, in the *Quartile* aspect to *Jupiter*, chief Ruler of the West-Angle, or seventh house in the Dignities of *Saturn*, and this *Quartile* aspect

from Cardinal signs, may not improperly shew many contests and unreasonable debates between man and man, probably under the pretence of Justice. But Mercury being also in Sextile to Mars, his disposer doth something to moderate the matter, and may by his influence upon the inclination of men lessen those controversies to a sudden conclusion, though perhaps more for fear than love.

Venus in the ninth house is also in Sextile to Mars, and thereby promise happiness to the Merchants in general, whose advantages should prove considerable this year in the season, the Moon is so potent in the Mid-heaven; its true nature is also in the house of long Journeys or Voyages, and shew something less than the good promised, and shews thereby the dangers or Shipwracks may casually happen: but for the reasons before hinted, not much to the detriment of those yearly publick spirited persons that frequently venture their Estates in that kind: upon the same consideration there may some small seeming prejudice occur to the learned Divines, and Divisions or controversies may unhappily arise (being fomented and promoted by some busie Phanaticks, or head-headed Sectarious) in point of Religion, which I presume will soon be settled again by the prudence of the Magistrate, who will also fall under the malicious censures of such dissatisfied persons, as is well signified or pointed at by Cauda draconis in the Mid-heaven. Many other things might be considered, but being confin'd to so narrow a scantling of Paper, I must therefore conclude my Judgment upon this present year.

The Diseases commonly hapning this Quarter, are Fevers, Small-pox, Plucistles, Leprosies, Sore-eyes, &c. with many other Distempers proceeding from the blood corrupted; and now this year more especially, because it is in the house of Diseases in an Aereal sign.

Secondly, of the Summer.

The Summer season or Solstice always begins where the Vernal Equinox ends, and takes its Name *as Aries*, because of the very great heat which this season always (for the most part) affords us, or else it's called Summer according to the Germans *quasi Summe Mahr*; for then we have Plus for a greater portion and larger stay of the Sun with us, than any other times of the year. It consists of that quarterly time in which *Sol* passes through the sign *Cancer*, *Leo* and *Virgo*, and is naturally hot and dry, and assimilated to fire among the Elements, to Choller among the humours, and to Man-hood in humane Race. This Quarter begins the year upon Saturday June the 10th at 37 minutes past Seven in the afternoon, at which time 26 degrees of the Cælestial Ballance Colminates, and 22 degrees of that Royal sign *Sagittarius* ascends, & Lord thereof in γ α Δ to η and θ ρ , but in regard the signification of this Schem is for the most part included in the judgment of the vernal figure, there needs no more to be said in this place.

The Diseases that are principally reigning in mens bodies at this time, are Imposthumes, Pestilential Fevers, Jaundies, Burning-Agues, Madnels, Inflammations, with all other weaknesses proceeding from Choller; and therefore all such persons that are Chollerick, are at this time most unhealable. The Phlegmarick person enjoys the greatest freedom from sickness, because the powerful heat of the Sun in this season drives up the superfluous moisture that accustometh to distill into him, but to the Collerick person the Sun too potently dries the Radical moisture, leaving the Crass exceeding hot and dry, and consequently apt to generate any of the aforementioned Diseases, extremity of heat we see cleave the roughest Trees, nay the earth it self; and must therefore

Rock and tear mens bodies that are aptly disposed to it, as are the Collick persons. And thus much is sufficient to be said upon the *Summer Quarter*.

3. Of the Autumnal and Haruest Quarter.

THe Autumnal Equinox or third Quarter of the year beginneth always when the Sun enters the Celestial sign *Libra*, and continueth all that time he is passing through the signs of *Libra*, *scorpio*, and *Sagittary*. And this year it falls out to be upon Tuesday September the 12th. at ten in the morning, those that have a desire to see the position of Heaven may erect a Scheam for that time, I am confin'd to wave all Astrological discourse in this place, that of or upon the Suns Ingress into *Aries*, being sufficient for this present year; only this I shall acquaint the Reader, that the Autumnal season is cold and dry, and therefore is most aptly resembled unto the humour of melancholy; to the Earth among the Elements, and to the old declining Age of man-kind.

The Diseases that are principally observed to torment and discompose men in this Quarter, are pains in the back, darkness of sight, Retention of Urine, also Cankers, Hemorrhoids, Piles, Fistula's, with all other Distempers proceeding from that Distractive humour of Melancholly.

4. Of the Winter or Brumal Quarter.

THe Hyemnal or Winter Solstice always commeth when Royal Sol toucheth the first point of the Tropical sign *Capricorn*, and continues during the time he perambulates through the sign, *Capricorn*, *Aquarius* and *Pisces*. And the annual Circle being thus finished, that glorious Lamp of Heaven the Sun mounts *Aries* or the Celestial Ram

Run again; beginning here the Spring of the ensuing year, all the Seasons, and how they are made, are well exprest in this short piece of Poetry.

*Bright Phoebus running his Bellipotet Ring,
Dart make both Autumn, Winter, Summer, Spring.*

THe winter Quarter this year commences upon Sunday the 16th day of November at 49 minutes past 9 at night in the Meridian of London (as all the other are computed for) there needs nothing to be said upon the position of the Heavens for the reasons before hinted, but I proceed to inform you that the Natural temper of this season is cold and moist. Rain being more frequent now than at other times of the year, because the Stars of Order now are with the Sun, thereby raising tempests and Storms of Rain &c. But at some times by the various configuration of the Planets, this general inclination is over-powered when we have often Frosts, &c. but of itself this is the proper Nature, and very pertinently resembled to Plegme among the humours, and to water among the Elements, and to the most decrepid age of Man-kind.

The Diseases in particular appropriated to this Quarter are Fluxes of blood, Tooth-ach, Scabbs, Pusshes in the face, defluxions and Rheums, Palfies Gouts, and all other Diseases proceeding from corrupted Phlegme.

And thus the Reader is presented with a true Chorography of the four Seasons or Quarters of the year. In the next place I shall give an account of the Eclipses that happen this present year, and so conclude.

Of the Luminarian Eclipses that happen this present year,
1676.

By Astronomical computation it appears, that this year there will be two Eclipses, and both of them of the Sun, the first of the Sun happens June the first, at half an hour after 9 in the morning, and will be visible to us, it falls in 21 degrees of the sign Gemini the ascendant of London, and will be also visible in several other Countries beyond the seas.

The second Eclipse of the Sun falls November the 24th. (viz. the middle time thereof) at 8 in the morning, it falls in the sign Scorpio, opposite to the place of the other Eclipse, and may in part be seen in our Kingdom. If the air be clear, what these Eclipses portend to the Inhabitants of the Earth, here is no Room to discourse, I must leave that to be discussed by other Pens.

There is also a notable Conjunction of Jupiter and Mars upon the 15. day of July, which may be seen if clouds interpolate not, as I have before intimated in my Observations upon that month.

Hearts take thine ease,

Men have to please,

Thou hast may'st offend,

Though fault's like ill

Off thee some will

Like better, there's an

End.

ADVERTISEMENT.

IF any other Almanack for 1676, come abroad under the
 name of T. Cadbury, which is Printed for the Com-
 PATENT STATIONERS; it is not Written or Printed by
 the said Company; Who by Virtue of Letters
 granted to the first year of King James, have the
 sole Privilege to Print, all and all manner of Almanacks,
 Ephemerides, &c. and with Prohibition to all others.

IF any Almanack come abroad under the name of
 T. Cadbury, every Buyer may believe it to be a com-
 mon one, because it's well known that Mr. Cadbury hath not
 been able for many years to digest his astrological fancies in
 less than 9. Sheets; and hath refused rather to encrease them
 than to his yearly Book, being troubled that his Genius
 should be bounded to any number of Sheets.
